

# Harmony champions biodiversity at the 4<sup>th</sup> Business Advisory Group event

DECEMBER 2024

**On Monday, 2 December, Harmony joined leading businesses and conservation experts at the 4th Business Advisory Group on Biodiversity—a pivotal event aimed at redefining the role of business in biodiversity conservation.**

Hosted in collaboration with the Department of Forestry, Fisheries and Environment (DFFE), the South African National Biodiversity Institute (SANBI), and the Endangered Wildlife Trust (EWT), the forum emphasised meaningful dialogue and actionable strategies for integrating biodiversity into corporate practices.

Nivashni Govender, Harmony's Senior Environmental Manager, was honoured to serve as a panellist, sharing insights and expertise on the critical intersection of business and biodiversity.

This participation underscores Harmony's ongoing commitment to sustainability and its role as a responsible corporate leader in conservation efforts.

Harmony's journey toward a *Nature Positive* future is well underway, marked by the completion of its first biodiversity footprint assessment in collaboration with EWT. This milestone represents significant progress in understanding and mitigating environmental impacts, with the findings set to be shared soon.

*"Harmony is driving towards Nature Positive by understanding our biodiversity impacts and developing an action-based roadmap towards no net loss and ultimately positive impacts."*

**Dr. Urishanie Govender, Harmony's Chief Sustainability Officer.**
