Key features

Of the quarter...

- ▶ Gold production 3% higher at 10 152 kg (326 394 ounces)
- ▶ Grade remained steady
- ▶ R/kg cost higher at R242 851/kg (\$1 115/oz) due to increased electricity and stores costs, as well as inclusion of Target 3
- ▶ Cash operating profit 5% higher at R901m (US\$133m)

Of the year...

- ▶ Improved safety rates
- ▶ Operations in build-up showed 22% improvement in production
- ▶ Improved underground grade at 4.60g/t
- ▶ Net profit of R617m/US\$87m (loss of R192m/US\$24m in FY10)
- ▶ Basic earnings per share at R1.44 (21 Usc) (loss of 46c (6 Usc) in FY10)
- ▶ Headline earnings of R957m/US\$137m (R4m in FY10)
- ▶ Wafi-Golpu resource at more than 1 billion tonnes
- ▶ Created financial flexibility: US\$300m debt facility

Financial summary for the fourth quarter and year ended 30 June 2011

| | | Quarter June 2011 | Quarter March 2011 | Q on Q Variance % | Year ended June 2011 | Year ended June 2010 | Y on Y variance % |

(1) Production statistics for Steyn 2 and Target 3 have been included. Steyn 2 is currently in a build-up phase and Target 3 was in build-up phase up to the end of March 2011. Revenue and costs are capitalised for the period that these mines are in build-up phase. Revenue capitalised includes: Quarter ending June 2011 Steyn 2, 27 kg (Mar 2011 – 14 kg) and Target 3, 0 kg (Mar 2011 – 250 kg), year ended June 2011 Steyn 2, 90 kg (June 2010 – 33 kg) and Target 3, 531 kg (June 2010 – 117 kg).

Harmony's Annual Report, Notice of Annual General Meeting, its Sustainable Development Report and its annual report filed on a Form 20F with the United States' Securities and Exchange Commission for the year ended 30 June 2010 are available on our website (www.harmony.co.za).

Forward-looking statements

This quarterly report contains forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 with respect to Harmony's financial condition, results of operations, business strategies, operating efficiencies, competitive positions, growth opportunities for existing services, plans and objectives of management, markets for stock and other matters. Statements in this quarter that are not historical facts are "forward-looking statements" for the purpose of the safe harbour provided by Section 21E of the U.S. Securities Exchange Act of 1934, as amended, and Section 27A of the U.S. Securities Act of 1933, as amended. Forward-looking statements are statements that are not historical facts. These statements include financial projections and estimates and their underlying assumptions, statements regarding plans, objectives and expectations with respect to future operations, products and services, and statements regarding future performance. Forward-looking statements are generally identified by the words "expect", "anticipates", "believes", "intends", "estimates" and similar expressions. These statements are only predictions. All forward-looking statements involve a number of risks, uncertainties and other factors and we cannot assure you that such statements will prove to be correct. Risks, uncertainties and other factors could cause actual events or results to differ from those expressed or implied by the forward-looking statements.

These forward-looking statements, including, among others, those relating to the future business prospects, revenues and income of Harmony, wherever they may occur in this quarterly report and the exhibits to this quarterly report, are necessarily estimates reflecting the best judgment of the senior management of Harmony and involve a number of risks and uncertainties that could cause actual results to differ materially from those suggested by the forward-looking statements. As a consequence, these forward-looking statements should be considered in light of various important factors, including those set forth in this quarterly report. Important factors that could cause actual results to differ materially from estimates or projections contained in the forward-looking statements include, without limitation:

- ▶ overall economic and business conditions in the countries in which we operate;
- ▶ the ability to achieve anticipated efficiencies and other cost savings in connection with past and future acquisitions;
- ▶ increases or decreases in the market price of gold;
- ▶ the occurrence of hazards associated with underground and surface gold mining;
- ▶ the occurrence of labour disruptions;
- ▶ availability, terms and deployment of capital;
- ▶ changes in government regulation, particularly mining rights and environmental regulations;
- ▶ fluctuations in exchange rates;
- ▶ currency devaluations and other macro-economic monetary policies; and
- ▶ socio-economic instability in the countries in which we operate.

Chief Executive's Review

With another financial year that has drawn to a close, it is important to take stock of what we have achieved and to assess the progress made against our ambition to create a company capable of generating earnings that fund growth and dividends on a sustainable basis.

During financial year 2011, we:

- commissioned excellent gold mines in South Africa and Papua New Guinea (PNG);
- expanded the world class Wafi-Golpu resource to 9 million tonnes (Mt) of copper and 26.6 million ounces (Moz) of gold (100%);
- increased production from growth projects by 22% year on year;
- tailored each mine's business plans to its unique requirements;
- pro-actively addressed industry challenges;
- improved production and productivity at most of our mines, and continue to work at replicating that level of success across the board;
- increased Harmony's exploration exposure in PNG – a country with world class exploration potential – to 8000 km²;
- improved the quality of our asset portfolio through the disposal and closure of non-core assets;
- celebrated Harmony's 60th year in operation on 25 August 2010.

We made good progress in getting the company where we want it to be – producing better quality ounces. Hidden Valley in PNG is now an operating mine, Harmony's first greenfields offshore development, which was formally opened in September 2010; in South Africa we have Kusasalethu, Doornkop and Phakisa projects, all of which are in build-up, and Tshepong and Masimong which have been steady contributors to production. We dealt with the challenges at mines such as Evander, Target and Joel to ensure these mines are positioned to deliver on their production targets.

Harmony has invested a great deal in the expansion of its production base in South Africa and PNG. The investment in exploration continues to pay dividends, with the Wafi-Golpu resource showing a phenomenal 57% increase to over 1 billion tonnes during the year. Golpu's grade is over 1% copper, confirming it is one of the highest grade copper gold porphyry systems in South East Asia. These excellent results validate our long-held belief that PNG is a game-changing region for Harmony.

On a 100% basis, Golpu alone now hosts a resource of 869Mt, containing 19.3Moz of gold and 9.0Mt of copper (62Moz on a gold equivalent¹ basis). This represents a significant year-on-year increase, with an additional 368Mt (73% increase), comprising 8 956kt copper (88% increase) and 10.5Moz ounces of gold (119% increase). Our resource base in PNG now represent 10% of Harmony's total gold resources (or 21% of the resource on a gold equivalent basis), which is in line with the Company's strategy to increase its geographic diversification.

Annual production was lower than planned at 1.3Moz, largely due to safety stoppages and under-performance at some of the shafts. We continue to improve the business planning process, using benchmarks and targets we believe to be realistic. Our 'life of mine' plans support our commitment to improving the grades from our underground operations, lowering our cost base and benchmarking our costing parameters internally across our operations as well as externally

against other gold producers. Our focus remains on producing safe, profitable ounces and our operations in build-up will add to our production in future.

Safety

Tragically, three employees (South Africa) and one contractor (PNG) lost their lives during the final quarter of the financial year. The deceased were Mbuzeni Sihoyiya, a locomotive guard at Kusasalethu, Michael Sello Matea, underground assistant at Joel, Mbuyiseli Malungisa, a locomotive guard at Masimong and Kerry Kowitz, a contractor working on the Wafi-Golpu access road. I would like to extend my deepest condolences to their families, friends and colleagues.

Safety is a top priority at Harmony. We have put in place a number of safety initiatives, which have resulted in excellent safety achievements. Fatalities do, however, continue to occur. As a result, we appointed Alwyn Pretorius (previously the chief operating officer: North region), who is very familiar with Harmony's underground working environment, to assist in further improving and accelerating the execution of our safety and health strategy.

Gold price

Increasing global economic uncertainty is making gold an even stronger investment option than it already was. At over \$1 700/oz, gold remains a currency and we believe the gold price will continue its strength. Investors in Harmony have complete exposure to the spot gold price, as the company does not hedge its gold. During the past quarter the gold price received strengthened from R312 029/kg to R329 536/kg.

Operational results

Quarter on quarter

Gold production for the June 2011 quarter is 3% higher than the previous quarter, despite days lost to public holidays. The past quarter saw excellent improvements in development metres, mainly at the build-up operations. Build-up at Phakisa, Doornkop, Kusasalethu and Hidden Valley progressed well.

Grade remained steady at 2.08g/t.

Year on year

Tonnes milled for the year under review increased by 7% or 1 317 000 tonnes when compared to the previous financial year. The main contributors were:

- *Doornkop*: The build-up resulted in an additional 178 000 tonnes (33%) being milled for the year under review;
- *Target 3*: The inclusion of its first commercial production during the June 2011 quarter (75 000 tonnes);
- *Free State surface operations*: Tonnes increased by 1.2 million tonnes, mainly waste rock dumps;
- *Hidden Valley*: Recorded a full year of production and tonnes milled increased by 1.4 million tonnes to 1.7 million tonnes, achieving its production guidance for the year.

The operations in build-up showed an increase in gold production. Hidden Valley produced 3 118kg, an additional 1 215kg (64%) in comparison to the 1 903kg it produced in the previous financial year. Doornkop's production increased by 562kg (29%), Phakisa's by 391kg (29%) and Kusasalethu's by 165kg (3%). Gold production for the

Results for the quarter and the year ended 30 June 2011

year under review decreased by 9% (3 898kg), mainly as a result of the shafts that were closed in the 2011 financial year. Closed shafts accounted for a decrease in gold produced of 4 092kg year on year. Underground grade increased year-on-year to 4.60g/t.

Financial overview

Quarter on quarter

Quarter on quarter, cash operating costs in R/kg terms were 12% higher, mainly due to higher electricity and stores costs, as well as the inclusion of Target 3 (which reached commercial production during the quarter) in our operating results. Higher stores costs are due to additional maintenance performed during public holidays. Electricity costs are higher due to a 25% increase in tariffs as from April 2011 and the inclusion of one month's winter tariff.

Operating profit at R901 million was 5% higher, mainly due to the increase in the average Rand gold price received to R329 536/kg.

Year on year

Cash operating costs in Rand terms increased by R686 million or 8%, mainly due to restructuring costs, the inclusion of Target 3, higher electricity costs and higher labour costs. This resulted in the cash operating cost in R/kg terms increasing by 16% from R195 162/kg in FY10 to R226 667/kg in FY11. Rand per tonne unit costs remained stable at R469/tonnes.

Capital expenditure for FY11 decreased by R317 million (10%) compared to the previous financial year. This is mainly attributed to a reduction in capital spent on Hidden Valley of 47% or R252 million. Capital from the South African operations decreased by R65 million (2%), due to reduced expenditure at Phakisa (R117 million), Doornkop (R50 million) and Kusasaletu (R50 million).

Reserves and resources

As at 30 June 2011, Harmony's mineral reserves amounted to 41.6Moz of gold, spread across Harmony's assets in South Africa and PNG. The reserves of Kusasaletu, Doornkop, Tshepong and Phakisa in South Africa and Hidden Valley in PNG now constitute 45% of Harmony's total mineral reserves. Once the pre-feasibility study of Wafi-Golpu has been completed, more ounces from PNG will be added to Harmony's reserves.

The reserve declaration excludes Rand Uranium reserves (the asset which is being held for sale), as well as some Evander projects which are no longer included in Harmony's long term mining plans. These exclusions, together with mine depletion, resulted in a decrease of 6.5Moz year on year, allowing Harmony to refocus on growing, developing and operating its portfolio of quality assets.

As at 30 June 2011 Harmony's attributable gold mineral resources were 163.9Moz. Gold resources in PNG increased 51% year on year to 16.3Moz and now comprise 10% of the group's total resource base.

Harmony's PNG resource inventory also includes economically significant copper, molybdenum and silver that co-occur with gold. Attributable copper resources grew by 2.1Mt to 4.5Mt, up 86% year on year (and equates to 9.75Moz on a gold equivalent basis¹). Molybdenum increased to 84 000 tonnes (up 50%) and silver increased to 55.16Moz (up 7.8%).

These increases were driven by resource expansions at Hidden Valley and Wafi-Golpu.

Creating financial flexibility

Harmony has strengthened its financial flexibility through obtaining a 4 year US\$300 million revolving credit facility with Nedbank Limited and FirstRand Bank Limited. The loan agreement was signed on 11 August 2011. This facility is specifically ear-marked for Harmony's activities in PNG.

Dividend

We are pleased to declare a dividend of 60 SA cents per ordinary share for the year ended 30 June 2011.

Looking ahead

Post year-end, following a five day strike, Harmony signed a two year wage agreement with the National Union of Mineworkers (NUM), Solidarity and UASA (collectively referred to as the "Unions") on the 2nd of August 2011. The increase in wages will be off-set by improvements in productivity aimed at the more effective utilization of our mining assets. Approximately 500kg of production was lost due to the strike.

The wage agreement between Harmony and the Unions also includes a profit share scheme in which all employees in the bargaining unit will share on a quarterly basis. The profit share will be based on 1% of operating profits less capital expenditure from the company's South African assets.

We look forward to having the Unions as our partners in creating a sustainable mining industry.

Financial year 2011 was filled with great achievements. We have improved our safety rates, secured excellent exploration results, continue to build up our operations and future production potential and certain operations have generated free operational cash flow.

Financial year 2012 promises to be equally exciting. We remain focussed on continuing to deliver on our long term targets and to maximise shareholder value.

Graham Briggs Chief Executive Officer

Note 1. Gold equivalent ounces are calculated assuming a US\$1150/oz Au, US\$2.50/lb Cu and US\$13.50/oz Ag with 100% recovery for all metals

Safety and health

Safety

The provision of safe and healthy working places remains a key priority for Harmony, as does the elimination of all workplace injuries and work-related ill health effects. This has always been an important area of focus for Harmony.

Harmony will continue to implement and maintain safety initiatives and is in the process of rolling out a new improved fall of ground strategy to further reduce fall of ground incidents – one of the main contributors to fatal accidents.

It is with deep regret that we report four fatalities during the June 2011 quarter, bringing total fatalities for the 2011 financial year to 16. This is an improvement on the previous financial year, which recorded 22 fatalities. However, we need to continue to work towards avoiding these incidents altogether.

Harmony's Lost Time Injury Frequency Rate (LTIFR) in South Africa remains a single digit, for the eleventh consecutive quarter. Quarter on quarter the LTIFR rate regressed from 8.65 to 9.64, whilst LTIFR also regressed with 8% to 8.32 when compared to the previous year.

The Reportable Injury Frequency Rate (RIFR) (per million hours worked) in South Africa regressed by 13% when compared to the previous year (from 4.19 to 4.73) and by 17% quarter-on-quarter (from 4.62 to 5.39).

The Fatal Injury Frequency Rate (FIFR) improved by 19% when compared to the previous year, but regressed by 44% quarter-on-quarter (from 0.09 to 0.13)

Safety achievements for the quarter included:

| | |
|---------------------------------------|--------------------------------|
| South African underground operations: | 1 000 000 fatality free shifts |
| Doornkop shaft operations: | 1 000 000 fatality free shifts |
| Doornkop total operations: | 1 000 000 fatality free shifts |
| Phakisa: | 500 000 fatality free shifts |
| Target: | 500 000 fatality free shifts |

Ongoing behavioural-based safety, competency training and development and research, together with the vigilant co-operation of our stakeholders, will continue to enable Harmony to become an even safer company to work for.

Health

Our pro-active approach to the health and wellness of our employees continues. Various programmes and initiatives are supported and sponsored by the company to ensure the wellbeing of our employees. Our objective remains to improve health management programs and effectively utilise clinical information. This includes the review of policies, procedures, and processes, as well as training, on an ongoing basis.

See our Sustainable Development Report for more details on our website www.harmony.co.za.

Financial overview

Quarter on quarter

Cash operating profits increased by 5% quarter on quarter to R901 million, mainly due to an increase in revenue driven by the 6% increase in the R/kg gold price received. The increase in revenue was offset by an 18% increase in production cost.

Earnings per share

Basic earnings per share decreased from 55 SA cents to a loss of 10 SA cents per share. Headline earnings per share decreased from 91 SA cents to 30 SA cents. Headline earnings have been adjusted for the impairment of assets as well as the reversal of the impairment of investment in associate.

Revenue

Revenue increased from R2 949 million to R3 422 million, or 16%, mainly due to the 6% increase in the rand gold price received to R329 536/kg. The increase of gold sold by 7% or 696kg, together with the inclusion of the results of Target 3, also contributed to the higher revenue total for the June 2011 quarter.

Cost of sales

Cost of sales increased from R2 623 million to R3 491 million in the June 2011 quarter. The main reasons for this increase are:

- higher production costs, driven by higher electricity costs which include the annual increase by Eskom as well as one month's winter tariff (R115 million increase); increased labour costs of

R67 million as a result of an increase in employees due to the build-up at certain shafts; an increase in stores cost due to higher production. Also contributing to the increase is the inclusion of costs related to Target 3, amounting to R93 million for the June 2011 quarter.

- an increase in amortisation and depreciation from R431 million in the March 2011 quarter to R477 million. This increase relates primarily to an increase in tonnes mined at several shafts as well as depreciation commencing at Target 3 as it was brought into commercial production;
- impairment of assets amounting to R264 million. The impairments relate to President Steyn 1 and 2 shafts (R99 million and R103 million respectively) and St Helena (R61 million of which R9 million relates to goodwill);
- the annual adjustment on the rehabilitation provision amounting to R61 million;
- annual assessments of gold inventory balances resulting in write downs for Steyn Plant (R41 million) and Target stockpile (R30 million) and an adjustment on the gold in lock-up (R21 million).

Exploration expenditure

During the June 2011 quarter, R102 million was spent on exploration. Of the amount spent during the quarter, R90 million relates to the PNG projects. The expenditure for the March 2011 quarter was R77 million, R68 million of which related to PNG. The increase quarter on quarter relates primarily to the pre-feasibility study being conducted at Wafi-Golpu.

Reversal of impairment/(impairment) of investment in associate

This movement relates to the limiting of costs relating to the Rand Uranium transaction as well as some foreign exchange movements.

Results for the quarter and the year ended 30 June 2011

Net gain on financial instruments

The movement for the June 2011 quarter comprises of the changes in fair value of the Nedbank Equity Linked Deposits held by the environmental trusts.

Investment income

Investment income for the June 2011 quarter was R24 million. This was a R40 million decrease quarter-on-quarter as the March 2011 quarter included amounts related to the successful appeal against interest levied by SARS as well as interest on outstanding diesel refunds, which were not repeated in the current quarter.

Finance cost

Finance cost increased by R18 million quarter-on-quarter. This was mainly due to the draw-down of additional funds from the Nedbank facility during the previous quarter.

Taxation

The deferred taxation credit for the June 2011 quarter of R195 million credit consists mainly of credits relating to the change in the Life-of-Mine rates, amounting to R119 million, as well as additional temporary differences.

Capital expenditure

Capital expenditure increased from R667 million to R788 million in the June 2011 quarter, as expected.

Borrowings

The long term portion of borrowings decreased from R1 487 million to R1 229 million in the June 2011 quarter as a result of the net repayment of R100 million on the Revolving Credit Facility and the instalment payments on the term facilities of R153 million.

Year on year

Cash operating profits increased by 12% to R3 275 million for 2011. This was mainly due to an increase in revenue driven by the 16% increase in the rand/kilogram gold price.

Earnings per share

Basic earnings per share increased from a loss of 46 SA cents to earnings of 144 SA cents per share. Headline earnings per share also increased from a loss of 7 SA cents to earnings of 223 SA cents.

Revenue

Revenue increased from R11 284 million to R12 445 million, or 10%, mainly due to the 16% increase in the rand gold price received to R307 875/kg. This increase was offset by the 7% decrease in gold sold.

Cost of sales

Cost of sales increased from R10 484 million to R11 615 million for 2011. This is mainly due to increases in production costs (driven by increased labour, electricity and stores costs) and amortisation and depreciation.

Exploration expenditure

During 2011, R353 million was spent on exploration with R296 million for PNG. The exploration expense in the income statement for 2010 was R219 million, with R165 million being spent in PNG.

Net gain on financial instruments

The movement in net gain on financial instruments for 2011 was R414 million, which includes R273 million recognised on the Witsgold transaction. The balance of the total relates to the changes in fair value of the Nedbank Equity Linked Deposits held by the Environmental Trusts.

Taxation

The deferred taxation credit for the year amounted to R492 million of which approximately R363 million relates to the change in the Freegold unredeemed capital allowance. The 2010 deferred tax charge of R251 million primarily related to increases in average deferred tax rates, notably at Evander.

Notice of cash dividend

Dividend No. 82 of 60 cents per ordinary share, being the dividend for the year ended 30 June 2011, has been declared payable on Monday, 19 September 2011 to those shareholders recorded in the books of the company at the close of business on Friday, 16 September 2011. The dividend is declared in the currency of the Republic of South Africa. Any change in address or dividend instruction to apply to this dividend must be received by the company's transfer secretaries or registrar not later than Friday, 9 September 2011.

| | |
|---|---------------------------|
| Last date to trade ordinary shares <i>cum</i> dividend | Friday, 9 September 2011 |
| Ordinary shares trade <i>ex</i> dividend | Monday, 12 September 2011 |
| Currency conversion date in respect of the UK own name shareholders | Monday, 12 September 2011 |
| Record date | Friday, 16 September 2011 |
| Payment date | Monday, 19 September 2011 |

No dematerialisation or rematerialisation of share certificates may occur between Monday, 12 September 2011 and Friday, 16 September 2011, both dates inclusive, nor may any transfers between registers take place during this period.

Operational overview

GROUP OPERATIONAL RESULTS

| Indicator | Units | June 2011 | March 2011 | % variance |
|-----------------------------|--------------|-----------|------------|------------|
| Tonnes | 000 | 4 861 | 4 646 | 5 |
| Grade | g/t | 2.08 | 2.06 | 1 |
| Gold produced | Kg | 10 152 | 9 857 | 3 |
| Cash operating costs | R/kg | 242 851 | 217 802 | (12) |
| Operating profit | R'000 | 900 734 | 855 078 | 5 |

Gold production for the June 2011 quarter is 3% higher than the previous quarter, despite days lost to public holidays. Cash operating

costs in R/kg terms were 12% higher, mainly due to higher electricity and stores costs, as well as the inclusion of Target 3 in our operating results (Target 3 was brought into commercial production during the past quarter).

Higher stores costs are due to additional supplies used to support the increased production, as well as additional maintenance performed during public holidays. Electricity costs were higher due to a 25% increase in tariffs as from April 2011 and the inclusion of one month's winter tariff.

Grade remained steady at 2.08g/t.

Operating profit at R901 million was 5% higher than the previous quarter, mainly due to the increase in the average Rand gold price received to R329 536/kg.

BUILD-UP AND STEADY OPERATIONS

SOUTH AFRICA

Doornkop

| Indicator | Units | June 2011 | March 2011 | % variance |
|----------------------|-------|-----------|------------|------------|
| Tonnes | 000 | 234 | 173 | 35 |
| Grade | g/t | 3.24 | 3.30 | (2) |
| Gold produced | Kg | 757 | 571 | 33 |
| Cash operating costs | R/kg | 239 316 | 229 447 | (4) |
| Operating profit | R'000 | 68 250 | 46 314 | 47 |

Doornkop delivered an excellent production quarter. Tonnes milled increased by 35% quarter-on-quarter to 234 000 tonnes and kilograms increased by 33% to 757kg. The increase in throughput is mainly due to an increase in development metres and eight additional crews.

The Doornkop plant performed better this quarter and further improvement is expected in the next quarter, as an additional mill will be available.

Kusasaletu

| Indicator | Units | June 2011 | March 2011 | % variance |
|----------------------|-------|-----------|------------|------------|
| Tonnes | 000 | 305 | 297 | 3 |
| Grade | g/t | 5.20 | 4.93 | 5 |
| Gold produced | Kg | 1 586 | 1 464 | 8 |
| Cash operating costs | R/kg | 219 880 | 200 579 | (10) |
| Operating profit | R'000 | 176 354 | 146 982 | 20 |

Improved mining execution, higher mining grades than planned at 5.20g/t and an increase in tonnes milled to 305 000 tonnes resulted in production being 8% higher quarter on quarter at 1 586kg.

During the June 2011 quarter a quality monitoring method, in the form of a short interval control system, was implemented. The system involves daily monitoring of results and allows management to address operational issues as and when they arise.

Phakisa

| Indicator | Units | June 2011 | March 2011 | % variance |
|----------------------|-------|-----------|------------|------------|
| Tonnes | 000 | 106 | 88 | 20 |
| Grade | g/t | 4.45 | 4.64 | (4) |
| Gold produced | Kg | 472 | 408 | 16 |
| Cash operating costs | R/kg | 284 475 | 286 765 | 1 |
| Operating profit | R'000 | 24 310 | 9 674 | >100 |

Phakisa recorded a 16 % increase in kilograms produced from 408kg in the March 2011 quarter to 472kg in the June 2011 quarter. The improvement was largely due to an increase in ore milled to 106 000 tonnes. Grade was 4% lower than the previous quarter at 4.45g/t.

Higher production alleviated the impact of higher electricity costs, resulting in cash operating costs remaining stable quarter on quarter at R284 475/kg, Higher production and a stronger gold price ensured a significant increase in operating profit from R10 million in the March 2011 quarter to R24 million in the June 2011 quarter.

Masimong

| Indicator | Units | June 2011 | March 2011 | % variance |
|----------------------|-------|-----------|------------|------------|
| Tonnes | 000 | 190 | 216 | (12) |
| Grade | g/t | 4.35 | 4.81 | (10) |
| Gold produced | Kg | 827 | 1 039 | (20) |
| Cash operating costs | R/kg | 214 694 | 175 496 | (22) |
| Operating profit | R'000 | 95 776 | 140 570 | (32) |

Masimong's exceptional record of 1.5 million fatality free shifts came to an end when a loco accident resulted in the death of an employee.

The fatality resulted in six lost days of production due to safety stoppages. Panel availability lead to a drop in B reef grade, resulting in the recovery grade being 10% lower quarter on quarter at 4.35g/t. Lower grade and a 12% decrease in tonnes milled to 190 000 tonnes, resulted in lower production at 827kg.

Cash operating costs were 22% higher quarter on quarter at 214 694/kg, due to a 10% decrease in grade and general cost increases, as outlined on page 6 of this report.

Target 1

| Indicator | Units | June 2011 | March 2011 | % variance |
|----------------------|-------|-----------|------------|------------|
| Tonnes | 000 | 168 | 161 | 4 |
| Grade | g/t | 4.11 | 4.88 | (16) |
| Gold produced | Kg | 690 | 785 | (12) |
| Cash operating costs | R/kg | 269 323 | 203 459 | (32) |
| Operating profit | R'000 | 51 169 | 59 007 | (13) |

Target 1 resolved the belt challenges experienced in the March 2011 quarter. More tonnes were hoisted as a result of new belts being inserted on the decline belt. Tonnes milled increased by 4% quarter on quarter to 168 000 tonnes.

The recovery grade was 16% lower in comparison to the previous quarter, mainly due to inconsistencies in the grade. As a result production was 12% lower than the March 2011 quarter at 690kg, with cash operating costs higher at R269 323/kg.

Target 3

| Indicator | Units | June 2011 | March 2011 | % variance |
|----------------------|-------|-----------|------------|------------|
| Tonnes | 000 | 75 | n/a | n/a |
| Grade | g/t | 3.65 | n/a | n/a |
| Gold produced | Kg | 274 | 250 | 10 |
| Cash operating costs | R/kg | 339 956 | n/a | n/a |
| Operating profit | R'000 | 930 | n/a | n/a |

Results for the quarter and the year ended 30 June 2011

Target 3 had its first quarter of commercial production since Harmony's acquisition of the asset in February 2010.

Target 3 recorded an operating profit of R930 000, with gold production at 274kg. Although cash operating costs were high at R339 956/kg, it should improve as the operation builds up its production.

Tshepong

| Indicator | Units | June 2011 | March 2011 | % variance |
|----------------------|-------|-----------|------------|------------|
| Tonnes | 000 | 327 | 333 | (2) |
| Grade | g/t | 4.50 | 5.04 | (11) |
| Gold produced | Kg | 1 473 | 1 679 | (12) |
| Cash operating costs | R/kg | 209 333 | 170 662 | (23) |
| Operating profit | R'000 | 179 753 | 236 045 | (24) |

Tshepong generated an operating profit of R179 million for the quarter. The 11% decrease in the recovery grade to 4.50g/t quarter on quarter is partially due to waste from the decline being hoisted with the ore.

Cash operating costs were higher at R209 333/kg. Electricity tariff increases, the inclusion of one month of winter tariffs and the increase of material for engineering activities contributed to the higher unit costs.

Hidden Valley

(held in Morobe Mining Joint Venture – 50% of attributable production reflected)

| Indicator | Units | June 2011 | March 2011 | % variance |
|----------------------|-------|-----------|------------|------------|
| Tonnes | 000 | 420 | 407 | 3 |
| Grade | g/t | 1.97 | 1.95 | 1 |
| Gold produced | Kg | 826 | 794 | 4 |
| Cash operating costs | R/kg | 238 644 | 216 981 | (10) |
| Operating profit | R'000 | 59 904 | 83 202 | (28) |

Production at Hidden Valley was 4% higher quarter on quarter at 826kg, mainly due the higher mill throughput and increased gold recoveries, which were partly offset by a lower gold feed grade.

Gold recoveries of 90% were sustained during the quarter. Mill throughput was higher, but remains constrained as a result of the overland conveyor belt failure in March 2011. Increased site costs are due to the additional ore haulage costs incurred to mitigate the loss of the overland conveyor. Repairs on the overland conveyor progressed to plan with the conveyor expected to be operating by the end of September 2011. Higher cash costs at R238 644/kg is partly offset by an increase in silver production and higher silver prices received.

Silver production increased by 31% quarter on quarter, due to higher feed grade and improved recoveries.

OTHER SOUTH AFRICAN OPERATIONS

Bambanani

| Indicator | Units | June 2011 | March 2011 | % variance |
|-------------------------|-------|-----------|------------|------------|
| Tonnes | 000 | 112 | 81 | 38 |
| Grade | g/t | 6.56 | 6.90 | (5) |
| Gold produced | Kg | 735 | 559 | 31 |
| Cash operating costs | R/kg | 302 668 | 333 259 | 9 |
| Operating profit/(loss) | R'000 | 25 032 | (12 961) | >100 |

The short interval control system implemented at Bambanani addressed ineffectiveness at the operation and resulted in improvements in tonnes milled and production. An operating profit of R25 million was generated, due to a 31% increase in gold production to 735kg and a 38% increase in tonnes milled to 112 000 tonnes. Grade requires more attention, with a 5% drop quarter on quarter to 6.56g/t.

Steyn 2

| Indicator | Units | June 2011 | March 2011 | % variance |
|---------------|-------|-----------|------------|------------|
| Gold produced | Kg | 27 | 14 | 93 |

The production at Steyn 2 is much higher than the previous quarter at 27kg, but build-up at this shaft remains below expectations. Major infrastructure challenges have been addressed and most of the major capital for the shaft pillar will be spent in the first and second quarter of FY12.

Evander

| Indicator | Units | June 2011 | March 2011 | % variance |
|----------------------|-------|-----------|------------|------------|
| Tonnes | 000 | 132 | 130 | 2 |
| Grade | g/t | 5.68 | 3.72 | 53 |
| Gold produced | kg | 750 | 483 | 55 |
| Cash operating costs | R/kg | 205 235 | 298 153 | 31 |
| Operating profit | R'000 | 88 615 | 7 304 | >100 |

Evander performed very well during the quarter, with a substantial increase in recovery grade at 5.68g/t, due to improvements in the face grade. More mining crews were moved into the main payshoot of the decline section, where the grade is higher.

Production at 750kg was higher quarter on quarter, resulting in a 31% decrease in cash unit costs to R205 235/kg and an operating profit of R89 million.

Joel

| Indicator | Units | June 2011 | March 2011 | % variance |
|----------------------|-------|-----------|------------|------------|
| Tonnes | 000 | 121 | 118 | 3 |
| Grade | g/t | 3.70 | 3.77 | (2) |
| Gold produced | kg | 448 | 445 | 1 |
| Cash operating costs | R/kg | 259 121 | 238 256 | (9) |
| Operating profit | R'000 | 34 627 | 30 997 | 12 |

Joel had a stable quarter, with gold production at 448kg and a slight drop in grade to 3.70g/t.

Cash operating profit increased by 12% to R35 million, largely due to a higher gold price received. Cash operating costs, however, increased by 9% quarter on quarter to R259 121/kg, due to an increase in electricity tariffs.

Unisel

| Indicator | Units | June 2011 | March 2011 | % variance |
|----------------------|-------|-----------|------------|------------|
| Tonnes milled | 000 | 106 | 104 | 2 |
| Grade | g/t | 3.96 | 4.49 | (12) |
| Gold produced | Kg | 420 | 467 | (10) |
| Cash operating costs | R/kg | 255 486 | 227 266 | (12) |
| Operating profit | R'000 | 31 884 | 38 814 | (18) |

Increased seismicity in the decline section resulted in production in certain working places being stopped and working crews being moved to the upper section, which has less flexibility. This impacted on the recovery grade, which declined by 12% to 3.96g/t and also resulted in production declining by 10% quarter on quarter to 420kg. Lower production and the increase in electricity tariffs and stores costs resulted in an increase in cash operating costs of 12% to R255 486/kg.

TOTAL SOUTH AFRICAN SURFACE OPERATIONS

| Indicator | Units | June 2011 | March 2011 | % variance |
|-----------------------------|-------------|-----------|------------|------------|
| Tonnes | 000 | 2 565 | 2 538 | 1 |
| Grade | g/t | 0.34 | 0.35 | (3) |
| Gold produced | Kg | 867 | 899 | (4) |
| Cash operating costs | R/kg | 268 657 | 227 335 | (18) |
| Operating profit | 000 | 64 130 | 69 130 | (7) |

Tonnes treated at the South African surface sources remained stable quarter on quarter at 2 565 000 tonnes. Production declined by 4% to 867kg due to a decrease in grade at 0.34g/t.

The unit cost increased to R268 657/kg, mainly due to the effect of electricity and water tariff increases during the quarter.

An operating profit of R64 million was generated, due to a higher gold price received.

Kalgold

| Indicator | Units | June 2011 | March 2011 | % variance |
|----------------------|-------|-----------|------------|------------|
| Tonnes | 000 | 392 | 373 | 5 |
| Grade | g/t | 0.69 | 0.74 | (7) |
| Gold produced | Kg | 270 | 276 | (2) |
| Cash operating costs | R/kg | 311 819 | 231 188 | (35) |
| Operating profit | R'000 | 18 247 | 19 740 | (8) |

An engineering plan was implemented over the last six months to improve the availability of equipment at the operation. This resulted in a 5% increase in tonnes milled to 392 000 tonnes. Lower grade areas were mined in the open pit during the quarter, resulting in production being 2% lower at 270kg.

Mechanical breakdowns at the plant, together with higher electricity costs resulted in a higher cash operating cost of R311 819/kg, which also impacted the operating profit, reducing it by 8% quarter on quarter to R18 million.

Phoenix (tailings)

| Indicator | Units | June 2011 | March 2011 | % variance |
|----------------------|-------|-----------|------------|------------|
| Tonnes | 000 | 1 247 | 1 242 | - |
| Grade | g/t | 0.11 | 0.12 | (8) |
| Gold produced | Kg | 137 | 149 | (8) |
| Cash operating costs | R/kg | 297 029 | 259 966 | (14) |
| Operating profit | 000 | 5 169 | 12 508 | (59) |

Tonnes milled at Phoenix remained steady at 1 247 000 tonnes.

The decrease in operating profit of R6 million for the quarter is as a result of an 8% decrease in grade. Cash operating costs were 14% higher quarter on quarter due to an increase in security costs following theft incidents and interruptions at the plant.

Surface dumps

| Indicator | Units | June 2011 | March 2011 | % variance |
|----------------------|-------|-----------|------------|------------|
| Tonnes | 000 | 926 | 923 | - |
| Grade | g/t | 0.50 | 0.51 | (2) |
| Gold produced | Kg | 460 | 474 | (3) |
| Cash operating costs | R/kg | 234 874 | 214 833 | (9) |
| Operating profit | 000 | 40 714 | 36 882 | 10 |

Treatment of tonnes at the surface dumps remained fairly flat quarter on quarter at 926 000 tonnes.

An increase in the operating profit to a total of R40 million is attributable to the higher gold price received during the quarter.

Development

Note: The ore reserve block grades reflect the grades of the blocks in the life-of-mine plans for the various operations. These blocks are to a large degree the blocks above a certain cut-off grade that has been targeted for mining. The development grades are those as sampled in the ongoing on-reef development at the operations and no selectivity has been applied from a grade point of view.

Bambanani

In the southern part of the sub-shaft area of the mine, development grades remain lower than expected. In the shaft pillar the grade remains above 3000cmg/t, which is in line with expectations.

Doornkop

The South Reef development grades are mostly in line with expectations and in line with the reserve grade. No on-reef development was planned for the Kimberly Reef.

Evander 8

Almost all on-reef development is now concentrated on the Kinross payshoot in the decline area of the mine. Although there was a quarter on quarter drop in the development grade due to local variations, the grades in the main raise lines remained in line with expectations.

Joel

Grades in the winzes being developed from 121 to 129 level, in the very prospective north-western portion of the mine, remain good.

Kusasaletu

On-reef development continues to return grades that are in line with the overall ore body grade and as predicted for the areas that are being developed.

Masimong

There was a quarter on quarter improvement in the grade of the B reef development. For most of the quarter the Basal reef development grades remained below expectation. The Basal grade is however starting to improve as the development is moving into better areas.

Phakisa

The development towards the north is showing positive results in line with expectation. These grades were however offset by lower grades from the development towards the south. Most of the development at Phakisa is still taking place in the lower grade central block with its very erratic nature in terms of grade. However, positive grade trends are emerging from the development towards the north, as expected.

Target (narrow reef mining)

Quarter on quarter there was an improvement in development grades of the narrow reef mining section at the Target 1 shaft. At Target 3 there has been a steady improvement in meters developed quarter on quarter.

Tshepong

In general the Basal Reef development grades were lower than expected, while the B reef continued to yield positive results in most of the target areas.

Unisel

At Unisel, the development grade of the Basal reef is in line with expectations, while the Leader reef grade was lower than expected. No on-reef development was done on the Middle reef for the quarter.

Exploration

International (Papua New Guinea)#

Morobe Mining Joint Venture (50% Harmony)

Wafi-Golpu

The pre-feasibility study is advancing well with all major contracts let. A project director has been appointed and a dedicated project office established. Drilling activities continued this quarter, with five rigs that drilled 6 798 meters targeting infill and extensions for Golpu, drill holes to gain samples for metallurgical testing for Wafi and geotechnical information for the Watut decline path.

The resource continues to grow and the timing of the completion of the study is dependent on the amount of infill drilling that will be required to gather sufficient information.

During the quarter, three holes were drilled in the southern and central part of the prospect to further increase the level of confidence in the geological model. Intercepts were as follows:

- WR390 707m @ 0.53%Cu, 0.49g/t Au from 771m
- WR398 554m @ 0.76%Cu, 0.52g/t Au from 554m
- WR392_W1 643m @ 1.39%Cu, 0.94g/t Au from 1133m including 350m @ 1.98%Cu, 2.17g/t Au from 1226m

Drill hole WR392_W1 intersected over 600m of strongly developed porphyry mineralisation and extended the mineralisation to both the east and the west of the previous interpretation.

A new zone of Wafi-style epithermal mineralisation was intersected between Nambonga and Golpu. The pre-collar of drill hole WR397 intersected 10m @ 9.1g/t Au from 389m and is located 200m north-east of WR392 (85m @ 3.2g/t Au). This new zone of mineralisation

is centred on a zone of quartz-carbonate veining and is open in all directions. It has the potential to develop into a near surface zone of high grade gold mineralisation.

The Wafi-Golpu resource statement (please refer to the Reserves and Resource press release of 20 July 2011 available on our website, www.harmony.co.za) confirms Harmony's long-held belief that Golpu is a world-class discovery. On a 100% basis, Golpu alone now hosts a resource of 869Mt at 1.03% copper and 0.69g/t gold, containing 19.3Moz of gold and 9.0 million tonnes (Mt) of copper (62Moz on a gold equivalent¹ basis). This represents a significant year-on-year increase, with an additional 368Mt (73% increase), comprising 4.2Mt copper (88% increase) and 10.5Moz of gold (119% increase) (see Table 1 below). The deposit has grown to the north and at depth, and the grade has also increased. The resource remains open at depth and to the north, with extension and infill drilling continuing (see Figure 1 below).

Table 1: Golpu (only) 2011 Resource statement in comparison to the 2010 declaration

| Golpu | Cut off % Cu | Tonnage Mt | Grade | | Metal | | Gold Equiv. (Moz) |
|----------|-----------------|---------------|-------------|-----------|-------------|------------|-------------------------|
| | | | Au (g/t) | Cu (%) | Au (Moz) | Cu (Mt) | |
| 2010 | 0.3% | 501 | 0.54 | 0.96 | 8.8 | 4.8 | 32 ^{*2} |
| 2011 | 0.2% | 869 | 0.69 | 1.03 | 19.3 | 9.0 | 62 ^{*1} |
| Growth | | 368 | 0.15 | 0.07 | 10.5 | 4.2 | 30 |
| % Growth | | 73% | 28% | 7% | 119% | 88% | 94% |

* Represents Harmony / Newcrest joint venture (MMJV) 100% portion

1. Gold equivalent ounces on 30 June 2011 are calculated assuming a US\$1150/oz Au, US\$2.50/lb Cu and US\$13.50/oz Ag with 100% recovery for all metals
2. Gold equivalent ounces on 30 June 2010 are calculated assuming a US\$950/oz Au, US\$2.00/lb Cu and US\$14oz Ag with 100% recovery for all metals

Figure 1: Golpu long section showing the comparison between the new 30 June 2011 Resource outline and the previous 30 June 2010 Resource outline.

Results for the quarter and the year ended 30 June 2011

The Golpu copper-gold deposit is a nested porphyry system that comprises at least three separate mineralised intrusions. Potential for additional mineralised intrusives along strike from Golpu, at Nambonga, and for additional feeder zones around the margins and at depth below the diatreme, is high, with the area hugely prospective and underexplored (see Figure 2 below).

The Wafi epithermal gold system is also expanding, with new zones of gold mineralisation discovered off the northern margin of the diatreme in areas never previously drill-tested.

Figure 2: The Wafi-Golpu System comprises the Golpu, Wafi and Nambonga Resources and significant growth potential

The increase in the Golpu resource has increased the Wafi Golpu System resource to over 1 billion tonnes, which is displayed in table 2 below.

Table 2: Wafi-Golpu System Resource Statement, comparing the 30 June 2011 declaration with the 30 June 2010 declaration

| Golpu | Tonnage (Mt) | Grade | | Metal | | Gold |
|----------|--------------|----------|--------|----------|---------|--------------|
| | | Au (g/t) | Cu (%) | Au (Moz) | Cu (Mt) | Equiv. (Moz) |
| 2011 | 1 012 | 0.82 | 0.89 | 26.6 | 9.0 | 70*2 |

1. Gold equivalent ounces on 30 June 2011 are calculated assuming a US\$1150/oz Au, US\$2.50/lb Cu and US\$13.50/oz Ag with 100% recovery for all metals

2. Gold equivalent ounces on 30 June 2010 are calculated assuming a US\$950/oz Au, US\$2.00/lb Cu and US\$14oz Ag with 100% recovery for all metals

The Wafi-Golpu resource has world class credentials, compared with other similar projects. See the graph below (Figure 3). Wafi-Golpu is of substantial size, with the resource having the highest copper and gold grade amongst its peers.

Wafi structural corridor

Outside of the Wafi-Golpu project area, several first class gold and copper-gold targets are being developed along strike on the Wafi-Transfer structure (see Figure 4). Main focus for the quarter included:

- Bavaga, where results to date have outlined a +1g/t stream sediment anomaly with a footprint of 2 by 1 kilometers and;
- Zimake, a circular magnetic anomaly approximately 5km by 6km with associated pan concentrate samples assaying up to 7.9ppm Au.

Both target areas are prospective for Wafi-style epithermal high sulphidation gold and associated Golpu porphyry copper-gold mineralisation. Reconnaissance work is continuing.

Figure 4: Regional setting of the Wafi-Golpu deposit showing Wafi-Transfer and main target areas

Results for the quarter and the year ended 30 June 2011

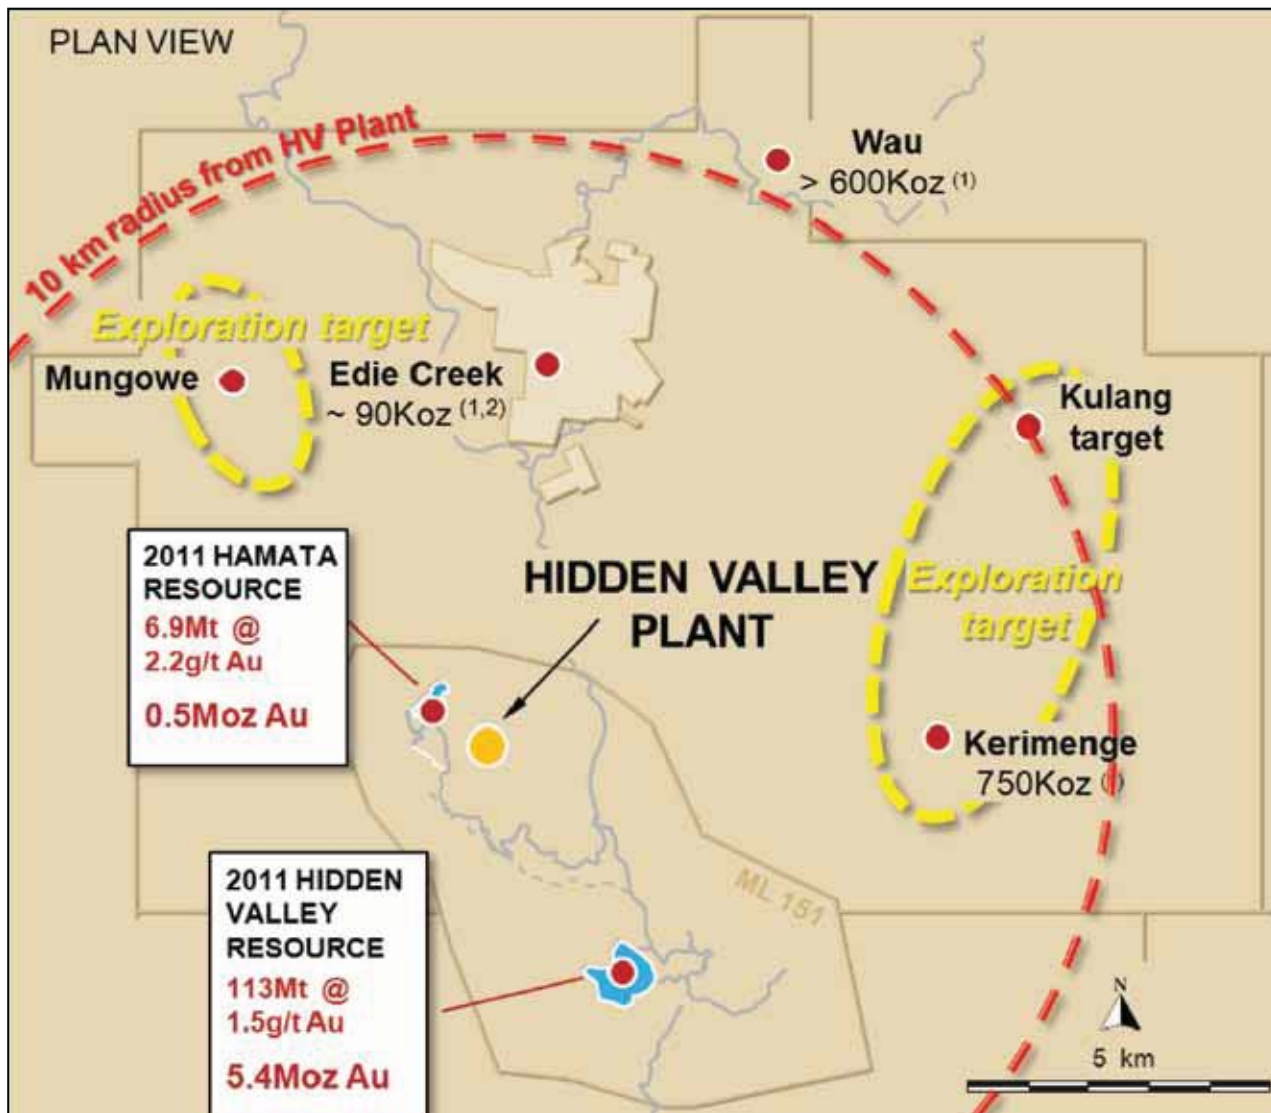

Hidden Valley district exploration

Excellent first pass results have been returned from the Mungowe prospect, located approximately 7km northwest of Hidden Valley. Mapping and rock chip sampling has outlined a high-grade zone of outcropping mineralisation with results including: 1m @ 87 g/t Au, 82.9 g/t Ag and 4m @ 31 g/t Au, 121 g/t Ag.

High grades are localised at the intersection of several fault zones, but this sits within a broader envelope of carbonate-base metal mineralisation and alteration covering an area of approximately 3km x 1.5km. The footprint of the anomaly together with its structural-geological setting similar to that at Hidden Valley, is very encouraging.

Prospect development work including compilation of results from the Kulang-Kerimenge trend continues.

Figure 5: HV satellite deposit target locations

PNG Exploration (Harmony 100%)

Outside of the Morobe Mining Joint Venture (MMJV), exploration work on the PNG tenement portfolio focused on the Mount Hagen Project, with drilling commencing at the Kurunga Prospect.

Mount Hagen project (EL1611 & EL1596)

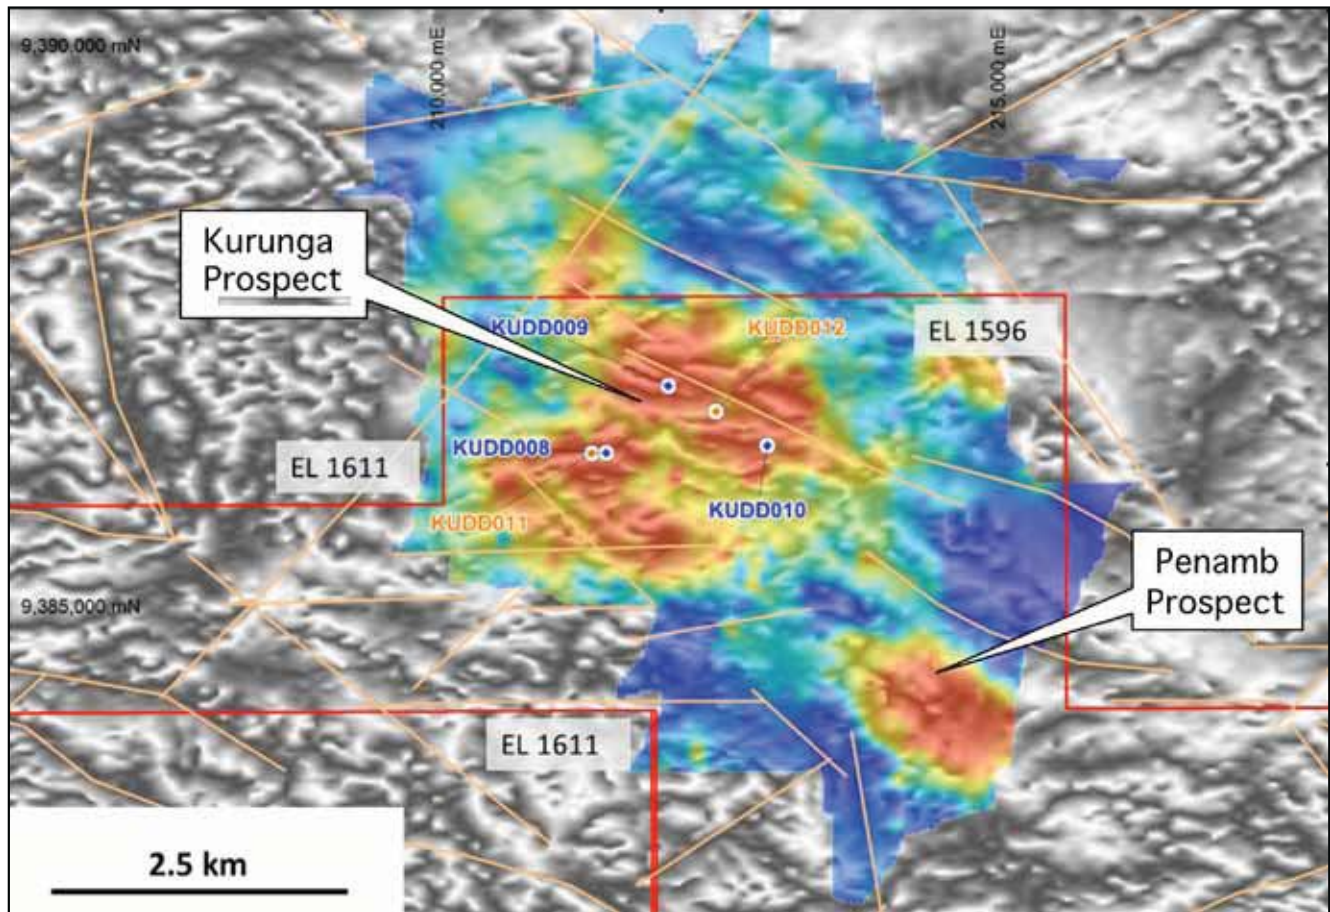

First-pass drilling at the Kurunga Prospect is underway to test three discrete copper anomalies in close proximity, each roughly 500-700m diameter. The anomalies exhibit typical porphyry style metal zonation, with a central Copper-Molybdenum (Cu-Mo) core (with patchy coincident gold (Au) surrounded by elevated Zinc-Lead (Zn-Pb) geochemistry. In addition, anomalies rank among the highest order geochemical targets in the entire mobile belt.

Initial assay results received to date have been encouraging. The top 132m of KUDD008 averages 170 ppm Molybdenum (Mo) and is accompanied by sporadic vein intervals of +0.1 % Cu. The assays also include an interval of high grade Mo mineralisation:

- KUDD009; 33m @ 343 ppm Mo from 4m.

Golpu resource grade averages 95 ppm Mo for comparison. Results indicate that the Kurunga system is metal bearing and confirms the prospectivity of the soil anomaly. The remainder of assays for the program are pending.

Figure 6: Greyscale magnetic image (analytic signal) over the Mt Hagen project area with colour overlay showing copper geochemical anomalies. The red areas represent high order copper anomalies ranging between 250 parts per million (ppm) to 0.14% copper.

Ridge and spur soil sampling and reconnaissance mapping have produced a 1 300m x 600m, coincident Cu-Au-Mo anomaly to the southwest of Kurunga at Penamb (refer figure 5 above). Preliminary field observations combined with historic mid-1980's Esso reports indicate the presence of a fertile Cu-Au porphyry system with significant phyllic and propylitic alteration zones within the main Penamb creek and along several ridges. Drill testing is planned for quarter 1 of FY12.

Amanab project (EL1708)

No fieldwork was undertaken during the quarter. Reconnaissance mapping and sampling is scheduled for the next quarter.

Note: The technical information was compiled by Greg Job, Harmony's Executive Growth and Resource Development for South-East Asia, who has the overall responsibility and accountability for the Golpu project, in terms of the South African Code for the Reporting of Exploration Results, Mineral Resources and Ore Reserves (SAMREC) 2007. Mr Job has 21 years' experience in mine and resource geology and is a member of the Australian Institute of Mining and Metallurgy. He is a full time employee of Harmony and qualifies as Competent Person as defined in the SAMREC Code and the Australian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves (JORC). Mr Job has consented to the inclusion of the exploration details based on the information in the form and context in which it appears.

South Africa

Uranium Project Tshepong, Phakisa, Masimong Project (TPM)

TPM evaluates the potential for the economic recovery of uranium from the ore mined at the Tshepong, Phakisa and Masimong operations in the Free State. The processing of the uranium enhances the gold recovery resulting in increased gold production from these operations. When the uranium is treated as a by-product, and therefore a credit to costs, operating costs of the contributing shafts will be reduced.

During the March 2011 quarter the feasibility study was completed. Higher operating and capital cost assumptions were used. This resulted in lower net present values than expected. A value engineering process is currently underway to further assess the net present value of the project.

Results for the quarter and the year ended 30 June 2011

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS FOR THE FOURTH QUARTER AND YEAR ENDED 30 JUNE 2011

1. Accounting policies

Basis of accounting

The condensed consolidated financial statements for the year ended 30 June 2011 have been prepared in accordance with IAS 34, Interim Financial Reporting, JSE Listing Requirements and in the manner required by the Companies Act of South Africa. They should be read in conjunction with the annual financial statements for the year ended 30 June 2010, which have been prepared in accordance with International Financial Reporting Standards as issued by the International Accounting Standards Board (IFRS). The accounting policies are consistent with those described in the annual financial statements, except for the adoption of applicable revised and/or new standards issued by the International Accounting Standards Board.

2. Cost of sales

| | Quarter ended | | | Year ended | |
|--|---|--|---|------------------------------|---|
| | 30 June 2011 (Unaudited) R million | 31 March 2011 (Unaudited) R million | 30 June 2010 (Unaudited) R million | 30 June 2011 R million | 30 June 2010 (Audited) R million |
| Production costs | 2 508 | 2 064 | 2 075 | 9 074 | 8 325 |
| Royalty expense | 13 | 30 | 28 | 96 | 33 |
| Amortisation and depreciation | 477 | 431 | 383 | 1 776 | 1 375 |
| Impairment of assets ⁽¹⁾ | 264 | – | 30 | 264 | 331 |
| Rehabilitation expenditure ⁽²⁾ | 61 | 4 | 14 | 74 | 29 |
| Care and maintenance cost of restructured shafts | 37 | 35 | 15 | 124 | 57 |
| Employment termination and restructuring costs | – | 26 | 82 | 158 | 205 |
| Share based payments | 45 | 28 | 41 | 136 | 148 |
| Other ⁽³⁾ | 86 | 5 | (19) | (87) | (19) |
| Total cost of sales | 3 491 | 2 623 | 2 649 | 11 615 | 10 484 |

(1) During the June 2011 quarter, an impairment of R264 million relating to President Steyn 1 and 2 shafts and St Helena was recorded. The impairments for the year ended 30 June 2010 relates mainly to the Virginia and Evander operations, which was recorded as a result of shaft closures.

(2) The expense for the June 2011 quarter results from the annual re-estimation of the rehabilitation obligation.

(3) Included in Other for the June 2011 quarter is R41 million for the write down of the Steyn plant demolition project.

3. Exploration expenditure

| | Quarter ended | | | Year ended | |
|---|---|--|---|------------------------------|---|
| | 30 June 2011 (Unaudited) R million | 31 March 2011 (Unaudited) R million | 30 June 2010 (Unaudited) R million | 30 June 2011 R million | 30 June 2010 (Audited) R million |
| Total exploration expenditure | 111 | 87 | 60 | 398 | 219 |
| Less: expenditure capitalised ⁽¹⁾ | (9) | (10) | – | (45) | – |
| Exploration expenditure per income statement | 102 | 77 | 60 | 353 | 219 |

(1) Relates to Brownfields exploration at Hidden Valley

4. Net gain on financial instruments

During the September 2010 quarter, a gain of R273 million was recognised on the Freegold option. This was following Harmony Gold Mining Company Limited (Harmony) entering into two transactions with Witwatersrand Consolidated Gold Resources Limited (Wits Gold), whereby Wits Gold obtains a prospecting right over Harmony's Merriespruit South area and the option held by ARMgold/Harmony Freegold Joint Venture Company (Proprietary) Limited (Freegold), a wholly owned subsidiary of Harmony, is cancelled.

The remainder of the total relates primarily to the increase in the fair value of the Nedbank Equity Linked Deposits held by the Environmental Trusts.

5. Deferred taxation

The deferred taxation credit of R195 million includes credits of R119 million related to the annual re-assessment of the deferred tax rates.

The deferred taxation credit of R309 million in the March 2011 quarter includes a deferred tax credit of R333 million relating to Freegold. South African Revenue Service (SARS) previously disallowed Freegold's "post 1973 gold mine" additional capital allowance claim, and also disallowed Freegold's application of mining ringfencing. The disputed matters were set down to be heard in the Income Tax Court of Johannesburg on 14 March 2011, but SARS withdrew the additional capital allowance claim on 10 March 2011, conceding that the Freegold operations are entitled to claim this capital allowance. The inclusion of the capital allowance caused an increase in the deferred tax asset on the balance sheet and the resulting credit in the income statement. For additional disclosure on the mining ringfencing application refer to note 13.

6. Disposal groups classified as held for sale and discontinued operations

Mount Magnet

The conditions precedent for the sale of Mount Magnet were fulfilled and the transaction became effective on 20 July 2010. A total purchase consideration of R238 million was received from Ramelius Resources Limited in exchange for 100% of the issued shares of Mount Magnet. The group recognised a total profit of R104 million net of tax, before the realisation of accumulated foreign exchange losses of R84 million from other comprehensive income to the consolidated income statement. The income statement and earnings per share amounts for all comparative periods have been re-presented to disclose the operation as a discontinued operation.

Investment in associate

The investment in Rand Uranium has been classified as held for sale following the decision by the shareholders to sell the business. In terms of the binding offer accepted by the shareholders on 21 April 2011, the capital portion of the subordinated shareholder's loan of R61 million due to the group will be repaid out of the sale proceeds. Where the carrying value of the investment exceeds the expected proceeds, an impairment is recognised in the income statement. An impairment of R142 million has been recognised for the 2011 year.

Evander 6 and Twistdraai

On 10 September 2010, Harmony concluded a sale of assets agreement with Taung Gold Limited (Taung), in which Taung acquired the Evander 6 Shaft, the related infrastructure and surface rights permits as well as a mining right over the Evander 6 and Twistdraai areas. The total purchase consideration is R225 million, which will be settled in cash when all remaining conditions precedent to the transaction have been fulfilled. In terms of an amended agreement Taung paid an amount of R100 million in April 2011. Refer to note 12 for additional disclosure.

7. (Loss)/earnings and net asset value per share

(Loss)/earnings per share is calculated on the weighted average number of shares in issue for the quarter ended 30 June 2011: 430.0 million (31 March 2011: 429.5 million, 30 June 2010: 427.6 million), and the year ended 30 June 2011: 429.3 million (30 June 2010: 426.4 million).

The diluted (loss)/earnings per share is calculated on weighted average number of diluted shares in issue for the quarter ended 30 June 2011: 431.4 million (31 March 2011: 430.7 million, 30 June 2010: 429.1 million), and the year ended 30 June 2011: 430.4 million (30 June 2010: 427.8 million).

*There is no taxation effect on these items.

Net asset value per share (cents)

| | At 30 June 2011 | At 31 March 2011 | At 30 June 2010 |
|-----------------------------------|-----------------------|------------------------|-----------------------|
| Number of shares in issue | 430 084 628 | 429 807 371 | 428 654 779 |
| Net asset value per share (cents) | 7 013 | 6 916 | 6 814 |

8. Property, plant and equipment and intangible assets

An impairment of R264 million has been recognised at 30 June 2011 for the President Steyn 1 and 2 shafts and St Helena. R9 million of the impairment relates to goodwill, which is included in intangible assets.

9. Inventories

A write down of R41 million was recorded for the Steyn plant demolition project as well as R21 million for the net realisable value adjustment for other gold in lock-up. In addition, a write down of R30 million was recorded for certain stockpiles.

Results for the quarter and the year ended 30 June 2011

10. Provision for environmental rehabilitation

An adjustment of R157 million was made to the liability following the annual re-estimation of the rehabilitation obligation.

11. Borrowings

| | 30 June 2011 R million | 31 March 2011 (Unaudited) R million | 30 June 2010 (Audited) R million |
|---|------------------------------|--|---|
| Total long-term borrowings | 1 229 | 1 487 | 981 |
| Total current portion of borrowings | 330 | 336 | 209 |
| Total borrowings^{(1) (2)} | 1 559 | 1 823 | 1 190 |

(1) In December 2009, the Company entered into a loan facility with Nedbank Limited, comprising of a Term Facility of R900 million and a Revolving Credit Facility of R600 million. Interest accrues on a day to day basis over the term of the loan at a variable interest rate, which is fixed for a three month period, equal to JIBAR plus 3.5%. Interest is repayable quarterly. The Term Facility is repayable bi-annually in equal instalments of R90 million over five years. The first instalment was paid on 30 June 2010.

In December 2010, the Company entered into an additional loan facility with Nedbank Limited, comprising of a Term Facility of R500 million and a Revolving Credit Facility of R250 million. Interest terms are identical to the original facility. The Term Facility is repayable bi-annually in equal instalments of R62.5 million over four years. The first instalment was paid on 30 June 2011. The terms of the original Revolving Credit Facility were amended to coincide with the repayment terms of the new Revolving Credit Facility, being payable after three years from December 2010.

At 30 June 2011, R400 million (31 March 2011: R300 million, 30 June 2010: R300 million) of these facilities had not been drawn down.

(2) Included in the borrowings is R51 million (31 March 2011: R58 million; June 2010: R91 million) owed to Westpac Bank Limited in terms of a finance lease agreement. The future minimum lease payments are as follows:

| | 30 June 2011 R million | 31 March 2011 (Unaudited) R million | 30 June 2010 (Audited) R million |
|--|------------------------------|--|---|
| Due within one year | 29 | 29 | 33 |
| Due between one and five years | 22 | 30 | 60 |
| Future finance charges | 51 (1) | 59 (1) | 93 (2) |
| Total future minimum lease payments | 50 | 58 | 91 |

12. Trade and other payables

Included in the balance at 30 June 2011 is an amount of R100 million paid by Taung to Harmony in terms of the amended agreement for the purchase of the Evander 6 shaft and Twistdraai areas. In terms of the amended agreement, the amount is repayable to Taung should the outstanding conditions for the transactions not be fulfilled.

13. Commitments and contingencies

| | 30 June 2011 R million | 31 March 2011 (Unaudited) R million | 30 June 2010 (Audited) R million |
|--|------------------------------|--|---|
| Capital expenditure commitments: | | | |
| Contracts for capital expenditure | 194 | 191 | 335 |
| Authorised by the directors but not contracted for | 1 504 | 2 175 | 1 006 |
| | 1 698 | 2 366 | 1 341 |

This expenditure will be financed from existing resources and borrowings where necessary.

Contingent liability

For a detailed disclosure on contingent liabilities refer to Harmony's annual report for the financial year ended 30 June 2010, available on the group's website at www.harmony.co.za. In addition the following contingencies have been added or amended:

- During March 2011, the Constitutional Court handed down judgement in the case of Mr Thembekile Mankayi v AngloGold Ashanti Limited (AGA) regarding litigation in terms of the Occupational Diseases in Mines and Works Act (ODIMWA). The judgement allows Mr Mankayi's executor to proceed with the case in the High Court of South Africa. Harmony was named as a second defendant in the original case. Should anyone bring similar claims against Harmony in future, those claimants would need to provide evidence proving that silicosis was contracted while in the employment of the Company and that it was contracted due to negligence on the Company's part. The link between the cause (negligence by the Company while in its employ) and the effect (the silicosis) will be an essential part of any case. It is therefore uncertain as to whether the Company will incur any costs related to silicosis claims in the future and due to the limited information available on any potential claims and the uncertainty of the outcome of these claims, no estimation can be made for the possible obligation.
- The Court's decision on Freegold's appeal regarding the South African Revenue Service's (SARS) application of mining tax ring-fencing was received on 1 August 2011 and the Court found in favour of SARS. The case was concluded in March 2011, but judgement was reserved at that time. The Company has decided to appeal the finding by the Court. Any additional income taxes payable are expected to be offset by additional deferred tax credits due to the impact this application will have on unredeemed capital.

- (c) On 18 April 2008, Harmony Gold Mining Company Limited was made aware that it had been named or might be named as a defendant in a lawsuit filed in the U.S. District Court in the Southern District of New York on behalf of certain purchasers and sellers of Harmony's American Depository Receipts (ADRs) and options with regard to certain of its business practices. Harmony has retained legal counsel. During January 2009, the plaintiff filed an Amended Complaint with the United States District Court (Court). Subsequently, the Company filed a Motion to Dismiss all claims asserted in the Class Action Case. On 19 March 2010, the Court denied the Company's application for dismissal and subsequently the Company filed a Motion for Reconsideration in which it requested the Court to reconsider its judgement. This matter was heard on 27 April 2010 and the Company's request for reconsideration of judgement was denied. The Company has subsequent to 30 June 2011 reached a mutually acceptable settlement with the lead plaintiff. The settlement requires final approval from the Court and no assurance can be given that the settlement will ultimately be approved.

14. Subsequent events

- (a) Refer to note 13(b) for details on the post balance sheet date event relating to the Freegold court case.
- (b) On 11 August 2011, the group entered into a US\$300 million Revolving Credit Facility. The facility has a term of four years and attracts interest at LIBOR plus 260 basis points. This arrangement is subject to certain conditions precedent being satisfied. The facility was jointly arranged by Nedbank Limited and Firstrand Bank Limited (acting through its Rand Merchant Bank division).
- (c) On 12 August 2011 the board approved a payment of dividend of 60 SA cents per share for the year ended 30 June 2011.

15. Segment report

The segment report follows on page 28 and 29.

16. Reconciliation of segment information to consolidated income statements and balance sheets

| | 30 June 2011 | 30 June 2010 (Audited) |
|--|-----------------|------------------------------|
| | R million | R million |
| The "Reconciliation of segment information to consolidated income statement and balance sheet" line item in the segment report is broken down in the following elements, to give a better understanding of the differences between the income statement, balance sheet and segment report: | | |
| Revenue from: | | |
| Discontinued operations | – | – |
| Production costs from: | | |
| Discontinued operations | – | – |
| Reconciliation of production profit to gross profit: | | |
| Total segment revenue | 12 445 | 11 284 |
| Total segment production costs and royalty expense | (9 170) | (8 358) |
| Production profit as per segment report | 3 275 | 2 926 |
| Less: discontinued operations | – | – |
| | 3 275 | 2 926 |
| Cost of sales items other than production costs and royalty expense | (2 445) | (2 126) |
| Amortisation and depreciation | (1 776) | (1 375) |
| Impairment of assets | (264) | (331) |
| Employment termination and restructuring costs | (158) | (205) |
| Share-based payments | (136) | (148) |
| Rehabilitation costs | (74) | (29) |
| Care and maintenance costs of restructured shafts | (124) | (57) |
| Other | 87 | 19 |
| Gross profit as per income statements * | 830 | 800 |
| Reconciliation of total segment mining assets to consolidated property, plant and equipment: | | |
| <i>Property, plant and equipment not allocated to a segment:</i> | | |
| Mining assets | 871 | 786 |
| Undeveloped property | 5 139 | 5 139 |
| Other non-mining assets | 70 | 72 |
| Less: Non-current assets classified as held for sale | – | (226) |
| | 6 080 | 5 771 |

* The reconciliation was done up to the first recognisable line item on the income statement. The reconciliation will follow the income statement after that.

17. Audit review

The condensed consolidated financial statements for the year ended 30 June 2011 on pages 18 to 29 have been reviewed in accordance with the International Standards on Review Engagements 2410 – "Review of interim financial information performed by the independent Auditors of the entity" by PricewaterhouseCoopers Inc. Their unqualified review opinion is available for inspection at the company's registered office.

Results for the quarter and the year ended 30 June 2011

(1) Production costs includes royalty expense.

(2) Production statistics for Steyn 2 and up to March 2011 for Target 3 are included for information purposes. Steyn 2 is in build-up phase and revenue and costs are currently capitalised until commercial levels of production are reached. Target 3 had reached commercial production levels in April 2011.

(3) Includes Kalgold, Phoenix, Dumps and President Steyn plant clean-up.

(4) The total excludes non-operational capital expenditure of R67 million relating to Papua New Guinea.

* Production statistics are not reviewed
