2 OPERATIONAL RESULTS

Quarter on quarter Gold production for the June 2015 quarter increased by 4% to 7 977 kilograms (Mar 15: 7 642kg) with significant improvements from Tshepong and Target 1.

- Tshepong's (+252kg) 20% increase in tonnes milled (42.000t) in the June 2013 quarter, combined with an BK improvement in the recovery grade to 4.43g/t (War 15: 4.12g/t) resulted in a 29% increase in kilograms produced;
- a 2% increase in Kilograms produced; Target 1 (*118kg) milled 13 000 tonnes (7%) more than in the March 2015 quarter, whilst the recovered grade increased by 6% to 5.03g/t (War 15: 4.73g/t) for the quarter under review, resulting in a 14% increase in gold production;
- review, resulting in a are increase in your production by 8% when compared to the March 2015 quarter mainly due to a 12% increase in the recovered grade to 1.64g/t (War 13: 1.46g/t) for the June 2015 quarter. The lincrease in recovered grade was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially offset by a 4% decrease in tennes miles of the second partial was partially of the second partial was partially of the

The increase in gold production was however partially offset by decreases at the following operations:

- Phakisa (-30kg) milled 5 000 tonnes (3%) less than in the March 2015 quarter, resulting in a 4% decrease in gold produced;
- Joel (-30kg) recorded a 14% decrease in the recovered grade at 3.83g/t (Mar 15: 4.43g/t). This was however partially offset by a 9% increase in tonnes milled resulting in a 5% decrease in gold produced;
- unisel (-27kg) recorded a 7% decrease in gold production as a result of a 7% decrease in the recovery grade to 3.75g/t (Mar 15:4.03g/t).

Production profit decreased by 2% to R627 million. In the June 2015 quarter, gold sold increased by 12% and revenue increased by 13% quarter on quarter.

During the June 2015 quarter the US dollar gold price received decreased by 2% to US\$1 195/oz (Mar 15: US\$1 220/oz), offset by a weakening of the rand against the dollar.

Cash operating costs for the June 2015 quarter were 8% higher quarter on quarter. Total capital expenditure for the June 2015 quarter increased by only 3% to R728 million (War 15: R710 million).

The all-in sustaining costs remained fairly steady with a 1% increase in the June 2015 quarter to R478 746/kg, compared to R474 873/kg in the March 2015 quarter.

Year on year Gold production for FY15 decreased by 8% to 33 513 kilograms, compared to 36 453 kilograms in FY14.

There was an increase in production at the following operations: Bambanani (+332kg) increased tonnes milled by 11% (23 000t) for FY15; combined with a 2% increase in the recovery grade to 12.70g/t (FY14: 12.50g/t) and gold production increased by 13%;

- Phakisa (*142kg) increased tonnes milled by 6% during FY15 to 611 000 tonnes.
- Gold production decreased at the following operations: Kusasalethu (-741kg) milled 235 000 tonnes (21%) less than in FY14. Production at the shaft was hampered by safety stoppages, underground fires and illegal mining activities during Fy15;
- Target 1's (-669kg) recovered grade returned to expected levels in FY15 at 5.11g/t (FY14: 5.83g/t) and was the main reason for the 15% decrease in gold production;
- reason for the 13% decrease in gold production; Hidden valley's (-349kg) tonnes milled decreased by 9% (176 000t) in FY15. Production was affected by a tear in the overland conveyor belt towards the end of the December 2014 quarter, as well as planned maintenance at the metallurgical plant in the first half of 2015;
- Masimong (-255kg) recorded a 9% decrease in the recovery grade at 3.68g/t for FY15, compared to 4.06g/t in FY14.
- Suspended operations: Target 3 (-930kg) was placed on cara and maintenance during FYIS and produced its last gold in the Ocember 2014 quarter. Stepn 2 (-92kg) was closed in FYI4 and produced no gold in FYI5.
- FINANCIAL RESULTS

Year on year production profit for FV15 decreased to R2.8 billion compared to R3.8 billion in FV14. This was mainly due to the 8% decrease in gold production, as well as a 6% increase in operating costs for FV15.

for ris.
Gold price received
The rand gold price received increased by 4% to
The rand gold price received increased by 4% to
The rand gold price received received to the rand gold in rise for the rand gold in rise was so the received to the rand against the US dollar from USS/R10.35 to USS/R11.45.

All-in sustaining costs All-in sustaining costs increased by 11% in FY15 to R458 626/kg, compared to R413 433/kg in FY14, largely due to the underperformance of some of our operations.

```
Revenue decreased by 2% as a result of the 5% decrease in gold
sold to 34 332kg in FY15, more than offset by a 4% increase in the
Rand gold price received at R449 570/kg in FY15.
```

Production costs increased by 6% to R12.6 billion in FY15. Cost containment remained a priority in FY15. cash operating costs only increased by 1% depite inflationary increases and increase are increased in the force of the first operation operati

Other items in costs of sales of sales for the year ended other items included in cost of sales for the year ended other items included in cost of temination and restructuring costs of R23 inilion mainly relating to restructuring at Kusasalethu, Rasianon, Hidden valley, management retrenchments and closure of Target 3.

Loss on scrapping of property, plant and equipment of Regal million loss on scrapping of property plant, and equipment of Regal million control of the property plant, and equipment of the life-of-mine optimisation process finalised in December 2014. The optimisation resulted in the abandoning of shaft levels and raise lines at Kusasalethu and Masinong.

Borrowings
At year-end total borrowings comprised R400 million drawdown
on the Nedbank facility as well as US\$250 million on the
US\$ revolving credit facility.

Quarter on quarter repairment of assets 471 million in the june 2015 quarter consists of an impairment of 82 ll4 million in respect of Hidden valley, 81 036 million on boornkop, R278 million on Phakisa and R38 million on

The impairments are due to the restructuring of operations for profitability and in response to low commodity prices and high operating costs, which resulted in a reduced life of mine.

Deferred taxation
A deferred tax credit of R558 million was recorded following the
net decrease in the deferred tax rates year on year for the South
African companies, and impairments recognised on property, plant
and equipment

Net loss for the June 2015 quarter was R3 152 million, mainly due to the impairment of R3 471 million recorded, compared to a net loss of R263 million in the March 2015 quarter.

Headline earnings per share Headline earnings per share increased to 44 SA cents from a loss of 60 SA cents in the March 2015 quarter.

South African underground operations
Operations as 23 30 une 2013 are 80.6 Pow C17.2 Wt at 8.68 g/t)
90 une 2014. This decrease is due to depletion by mining during at the year, the acclusion of predicts no 9 shaft and downscillar outside year of the acclusion of predicts no 9 shaft and downscillar underground operations as at 30 une 2013 are 11.0 Nov. 2003.

When the year is a standard of the year of the year is a standard to the year of year of

at Joel.

Appul New Guinea (PNG) operations
The company's mineral resources at the PNG operations as at
JOE company's mineral resources at the PNG operations as at
JOE company's mineral resources at the PNG operation of the PNG operation of the PNG operation of the PNG operation by mining during the year, and changes to the PNG operations as at 30 june 2013 are 20.5 Mos, a decrease
of 35 year on year from the 21.5 Mos declared as at 30 june
and changes to the life of miner (LOW) profile at Middle valley
operation. The reserves that we declared for Golpu are based on
the preferability study completed in 2012.

Total Harmony The company's attributable gold equivalent mineral resources are declared as 110.3 Moz as at 30 June 2015, a 18% decrease year on year from the 133.8 Moz declared on 30 June 2014.

The gold contained in the mineral resources in South Africa represent 63.5% of the company total, the PNG operations represent 36.5% of Harmony's total gold and gold equivalent mineral resources as at 30 June 2015.

As at 30 June 2015, Harmony's attributable gold and gold equivalent mineral reserves amounted to 42.5Moz of gold, a 14% decrease from the 49.5Moz declared at 30 June 2014.

The gold reserve ounces in South Africa represent 51.9% while the PNG gold and gold equivalent ounces represent 48.1% of Harmony's total mineral reserves as at 30 June 2015.

In converting the mineral resources to mineral reserves, the following commodity prices and exchange rates were applied:

A gold price of US\$1 230/oz
An exchange rate of US\$/ZAR11.38

The above parameters resulted in a rand gold price of R450 000/kg for the South African assets

The Hidden Valley mine and Golpu project in the Morobe Mining Joint Venture used commodity prices of US\$1 250/oz Au, US\$20/oz Ag, US\$10/lb Mo and US\$3.10/lb Cu at an exchange rate of US\$0.85 per A\$

ossa.Ju/10 tu at an exchange rate of US\$0.85 per AS Gold equivalent ounces a recalculated assuming uS\$1.400/oz Au, US\$3.10/10 tu and US\$23.00/oz Ag, and assuming a 100% recovery for all metals. These are the same assumptions as those used in the 2012 prefeasibility study for the calculation of gold equivalent ounces

Harmony's South African mineral resources and reserves were reviewed by SRK Consulting Engineers and Scientists for compliance with SAMREC.

The mineral resources and reserves of the Papua New Guinea assets were reviewed by AMC Consultants Pty Ltd for compliance with the standards set out in JORC.

Represents Harmony's 50% portion
** In Instances where individual deposits may contain multiple valuable commodities with a reasonable expectation of being recovered (for example gold and copper in a single deposit) Harmony computes a gold equivalent to more easily assess portion
of a deposit would be calculated as follows: (copper pounds x copper price per pound)/gold price per ounce. All gold equivalent calculations are done using metal prices and parameters as stipulated above.

Competent person's declaration
In South Africa, Harmony employs an ore reserve smnager at each of its operations who calculated as Section 1. South Africa, Harmony employs an ore reserve smnager at each of its operations who calculated as the reposition of the completent person of a section of the competent person of the competent person of the competent person of the competent person declaration or reserve smnager at each of its operations who calculated as the possibility for the completation of the competency of of th

In Papua New Guinea, competent persons are appointed for the mineral resources and mineral reserves for specific projects and operations.

The mineral resources and mineral reserves in this report are based on information compiled by the following competent persons:

On minimatchin Comprise by the following Competent persons:

- Resources and reserves south Africa:

Jaco Boshoff, BSC (Moss), MSC, MBA, PF, SCI, NBA, MSADAW, who
have converted to the Comprise of the Company of the

Mr Boshoff is the Harmony Lead Competent Person.

Resources and reserves Papua New Guinea: Gregory Job, BSc, MSc, who has 27 years' relevant experience and is a member of the Australian Institute of Mining and Metallurgy (AusIMM).

Mr Boshoff and Mr Job are full-time employees of Harmony Gold Mining Company Limited.

These competent persons consent to the inclusion in the report of the matters based on the information in the form and context in which it appears.

Jaco Boshoff Greg Job

* For the June 2014 quarter: Cash generated by operating activities previously reported as R470 million restated to R489 million. Cash utilised by investing activities previously reported as R656 million restated to R675 million. This is mainly related to the change in accounting policy for IFRIC 20, which became effective 1 July 2013.

The accompanying notes are an integral part of these condensed consolidated financial statements

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS for the year ended 30 June 2015 (Rand)

the year ended 30 June 2015 (Rame)
Accounting policies
The condensed consolidated financial statements for the year ended 30 June 2015 have been prepared in accordance with IAS 34,
Their condensed consolidated financial statements for provisional reports, SATCA Financial Reporting Guides as issued by the
The condensed consolidated financial statements for provisional reports, SATCA Financial Reporting Guides as issued by the
manner required by the Companies Act of South Africa. They should be read in conjunction with the annual financial statements for
the year ended 30 June 2013, which have been prepared in accordance with International Financial Reporting standards as issued
Financial statements, except for the adoption of applicable revised and/or new standards issued by the International Accounting

The following accounting standards, amendments to standards and new interpretations have been adopted with effect from 1 July 2014 and had no impact on the financial results of the group:

IFRS Annual Improvements 2010 - 2012 Cycle
1AS 32 Amendment - Presentation - Offsetting Financial Assets and Financial Liabilities
1AS 36 Amendment - Impairment of Assets - Recoverable amount disclosures for non-financial assets
IFRIC 21 Levient - Impairment of Assets - Recoverable amount disclosures for non-financial assets

1. The speciment in the June 2015 quarter consists of an impairment of \$2.11 billion on midden valley, \$1.04 billion on boornhop, \$272 million on whatis and \$43 million on rreddies \$7.75 million on Steps 2 million on Steps

Exploration expenditure
The Nammon board approved the updated Golpu project prefeasibility study in December 2014. The approval and the progression to
the final feasibility study stage demonstrates the technical and commercial viability of the Golpu project. As a result Narmony started
capitalising oproject exploration and evaluation expenditure for the Golpu project in the March 2015 quarted.

Taxation
A deferred tax credit of R558 million was recorded in the June 2015 quarter following the net decrease in the deferred tax rates year on year for the South African companies and impairments recorquised on property, plant and equipment. Included in the total is a debit of 864 million for the derecognition of the Australian deferred tax asset (See note 6).

For South African operations, values of US\$40.86, US\$23.35 and US\$5.84 per ounce were used for measured, indicated and inferred resources, respectively. For Hidden valley, values of US\$15.00 and US\$6.00 per ounce were used for indicated and inferred resources, respectively.

During the 2015 year, an impairment of R2.11 billion was recognised on Hidden Valley following a change in the life-of-mine plan during the annual planning process. Low commodity prices and high all-in sustaining costs resulted in a shortening in the life-of-mine of the operation. The revised plan also made the recoverability of the deferred tax asset for Australia unlikely, and

Following the decision to restructure Doornkop in May 2015, a revised life-of-mine plan was completed. The new plan resulted in a lower recoverable amount and an impairment of R1.04 billion was recognised. Other impairments include R278 million on Phakisa as cost pressures continue to impact profitability and R43 million for Freddies 9 as plans to develop the project further have been abandoned.

The recoverable amounts for the impaired shafts are as follows: Hidden valley R653 million (US\$53.7 million), Doornkop R1 866 million, Phakiss 83 989 million and Freddies 9 mill. These were determined on a fair value less costs to sell basis using Classified as level 3, disconnected Cach from models and attributable resource values. These are fair value neasurements
